To whom it may concern:

My name is Dr. Jeff Wright, Medical Director for the Utah Valley Health Clinic located in Provo, Utah. I am writing this letter to recommend the services of Purity Cloud Mold Removal (the Colorado licensee of Utah-based Pure Maintenance).

My team and I treat many mold-related diseases and illnesses and pride ourselves on giving our patients the best care possible. However, we found that constant re-exposure to mold at home would undermine our patients' progress and frustrate our care efforts.

When we started addressing the mold problem at home through a unique mold removal process used by Pure Maintenance, we experienced a significant and sustained improvement in the health of our patients.

We were first introduced to the "Demolition-free, Dry Fog Technology" employed by Pure Maintenance and its licensees in 2010. This proprietary technology eliminates all mold present in the home in a way that is more effective than anything else we've seen while also being affordable for our patients.

Like any responsible medical professional, I had my initial "too good to be true" reservations. But after years of seeing the dramatic and measurable difference it has made in the lives of our patients, we now recommend their services as part of the care protocol for many of our patients.

I'm confident you'll experience the same kind of success with your own patients. Feel free to get in touch, if you have any questions for me.

Best,

Dr. Jeff Wright
